## ÄIJÄ – JET-BLACK

Äijä released their debut-CD Jet-Black in March 2008. The CD is a collection of polyphonic traditional songs from around the world. The members of the Finnish/Swedish vocal quartet have collected these songs from various sources, including archives and field-trips. Jet-Black also includes an original composition based on the ancient Finnish Kalevala tradition.

Äijä have been singing together since 2001 and toured extensively in Finland and Sweden. The four members Eero Turkka, Pekko Käppi, Taito Hoffrén and Girilal Baars are all active as musicians and composers in other fields. Their shared passion for vocal polyphony is evident in these recordings which have been done in various indoor and outdoor locations in Finland and Sweden, including one track which was recorded in a car.

This CD has been released with support from The Finnish Performing Music Promotion Centre (ESEK).
